Abstract

We are Tortu Studio, a company made up by Emiliano Mandacen, Facundo Vastakas and Fernando Pertierra.

The decision to do the group was, considering the amount of areas which we must do, select people who have extensive knowledge in various areas so we will not have any problem in the future by the time of coding and writing the documentation for the final project.

the roles of the group are:

Coordinator: We selected Facundo Vastakas as a coordinator because we know he is capable of leading and making order inside the group and taking us to a successful project .

Sub-coordinator: We selected Emiliano Mandacen as a sub-coordinator for the same reasons we selected the coordinator with the exception that he preferred to choose this role instead of the other role because he didn't want to have more responsibility when we have to make a decision for the project.

Member: Fernando Pertierra.

On this occasion, we are going to develop a web application for the management of reserves for a remis company which allows a better control of equipment and reserves of all sections of the company.

What is more, we have to give two server proposals and 2 pcs proposals also with all the equipment so the company will be able to use the application without issues and in the server we will put the database which we have to create and configure.
